

INSTALLATION INSTRUCTIONS FOR WICKED/TIVIMATE/HOKEY

Welcome to Live streaming and unlimited Movies/ Tv Series. This system will provide you with a year of discounted TV that should save hundreds of dollars throughout the year. Below will explain to you, “how to install the apps” that you will be using to get all the shows that you could ever need.

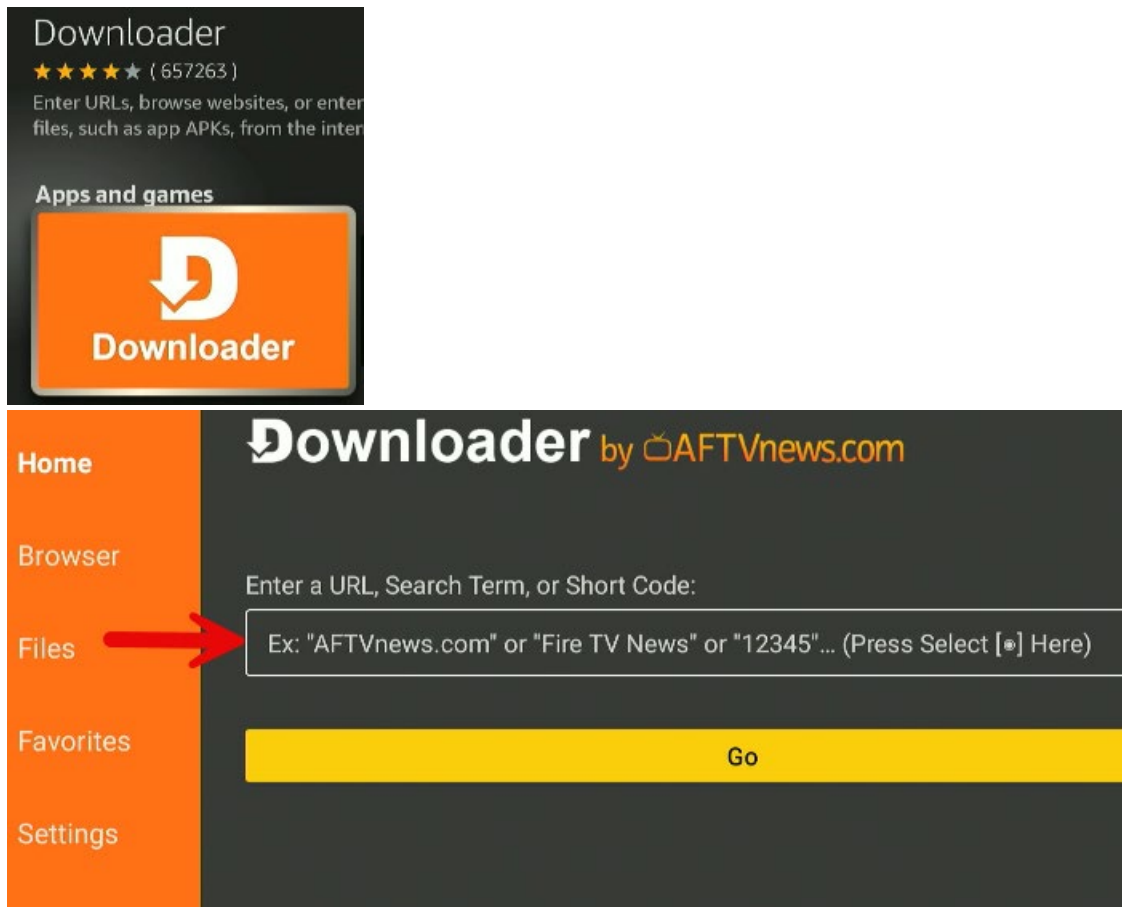

1. Open up the Firestick and perform any updates prior to signing in to your Amazon account. The amazon account will be the same credentials that you would use to sign into any Amazon Account.
2. Once the update and signing in process is complete, please enter the app overflow app in the favorites bar on the right side.

3. Then go to the Appstore and search for the app called “downloader”.

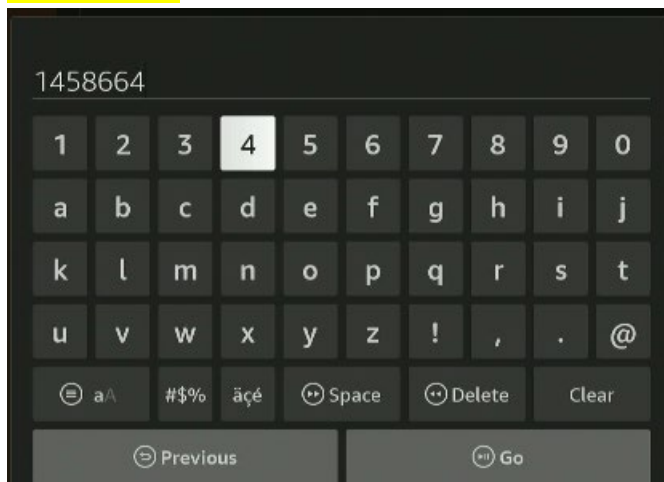

- Once you find the downloader app, install it. Then enter the app where you will see a URL at the top of the screen.

- At this stage you will want to enter a code for each app that you want to install. Enter them one at a time. After you enter the code, it will take a few moments to start installing. Please be patient.

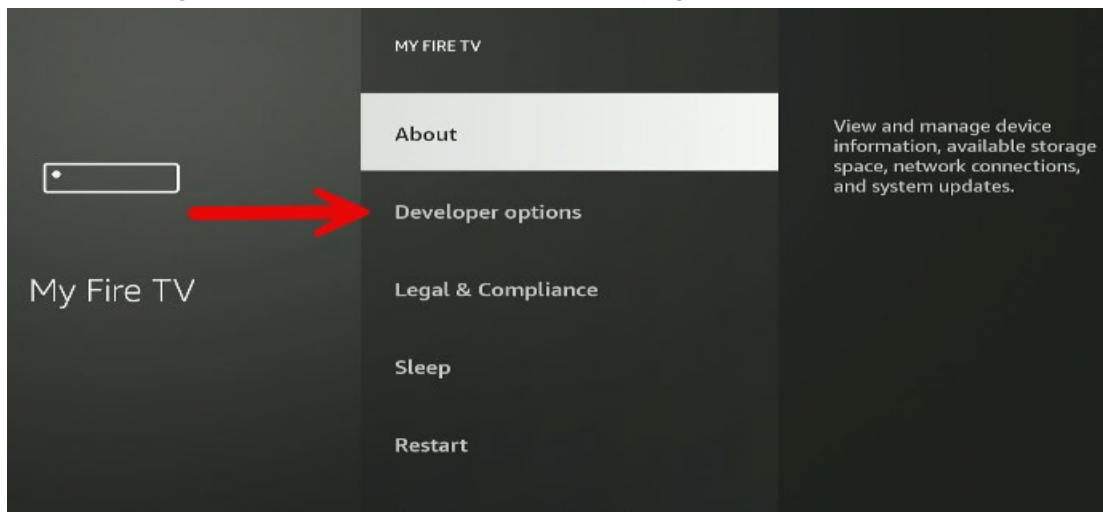

WICKED APP

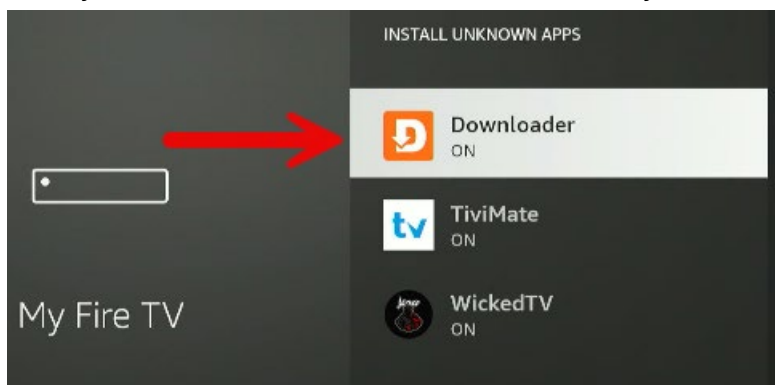

6. After you enter in the first code, it will take you to a settings page. Enter in the settings page and hit the enter button until it tells you that you are a developer.

7. Then you will go back on the remote and enter this page. You will enter developer options.

8. You will turn "on" the downloader setting. Once turned on, hit back on the remote till it takes you back to the install of wicked. You will only have to do this settings portion once.

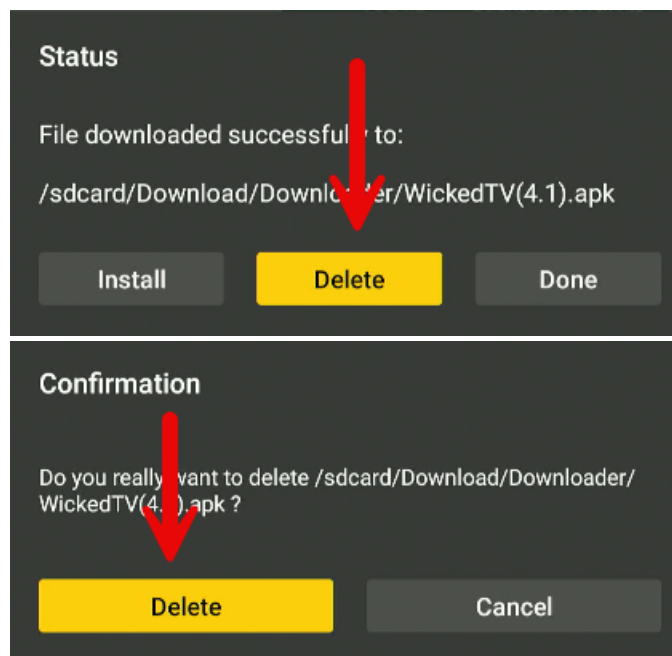

9. You will then install the wicked app.

10. Hit done

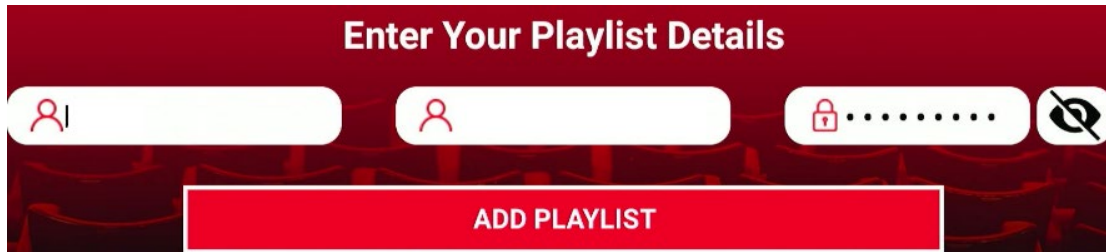

11. You will hit delete in two different blocks as shown below.

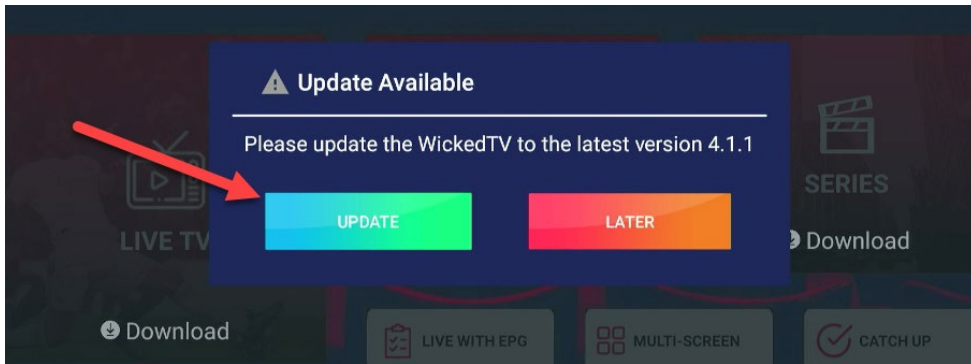

12. The app is now installed and will be stored in the app overflow app. You will need to go in there and move the app to your top favorites bar.

13. There is an update to the wicked app and it requires you to install it after you sign in with your username and password. It will show as per below. (follow steps)

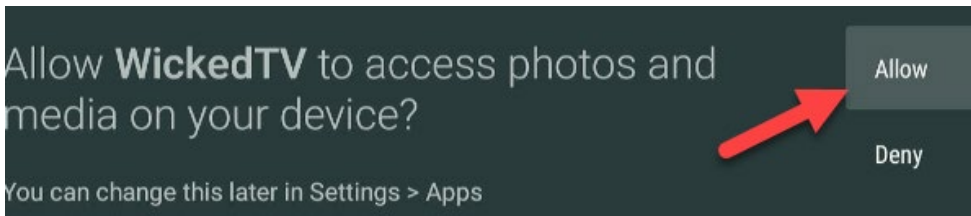

14. Sign in using your given information provided from your contact. The Nickname can be any name you wish. (if setup for you, it is usually all lower case of persons first name)

15. Once you have entered the information, ADD PLAYLIST. Then you will see this window pop up after. Hit Update

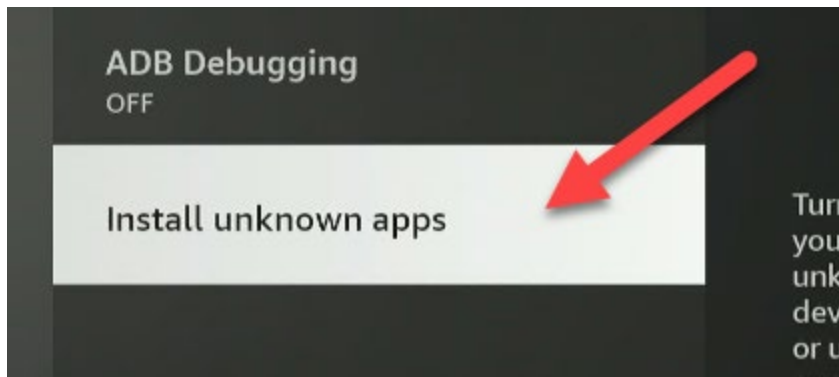

16. Allow photos and media to device. Once clicking, it will download the new version.

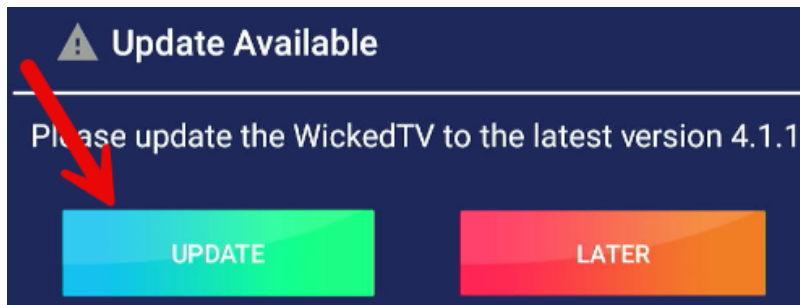

17. You will then need to turn on wicked and tivimate unknown apps as shown below.

18. Once you have turned these on, hit the back button on the remote and it will take you back to the wicked update box. You would hit update again and it would perform the last part of update.

19. Hit the install button and it will install the update and take you to the Wicked app. You are now updated and ready to use.

TIVIMATE

You will be using the same instructions from steps 4-5 on the following codes as well. You will need to enter this code in the downloader app in the ULR. Then use steps 9-12 for the rest.

Settings

A screenshot of a software interface with a dark background. On the left, there is a vertical list of options: 'KING', 'PRO', 'SPECTRA', 'Hostengine', and 'CCTV'. The 'KING' option is highlighted with a white rectangular box. A red arrow points from the right towards the 'KING' box. In the top right corner, there is a 'Cancel' button.

The screenshot shows the King IPTV app's login screen. It features a dark background with white text and input fields. At the top, the word "KING" is displayed in a light blue font. Below it, there are two input fields: "Username" and "Password". To the right of the "Password" field, there is a checkbox labeled "Include TV channels" and another checkbox labeled "Include VOD". At the bottom, there are two buttons: "Next" and "Back". Red arrows and numbers are overlaid on the image to guide the user through the login process. Arrow 1 points to the "Username" field, arrow 2 points to the "Password" field, and arrow 3 points to the "Next" button. A red text box at the bottom right contains the instruction: "Enter in user/password and hit next".

HOKEY

You will be using the same instructions from steps 4-5 on the following codes as well. You will need to enter this code in the downloader app in the ULR. Then use steps 9-12 for the rest.
